Industries

Mining

Our mining sector expertise is unparalleled. We have the knowledge and experience to address all aspects of your mining project. We offer comprehensive legal advice, both contentious and non-contentious, on the exploration, operation and production of various mining resources, including but not limited to metal and industrial minerals, precious metals and gemstones.

Services specific to mining industry:

- Dispute resolution on various commercial and administrative conflicts amongst business partners, other project stakeholders and regulators
- Legal due diligence
- Structuring and establishment of joint ventures and special purpose vehicles
- Advise on regulatory issues including obtaining exploration licenses, operation licenses, operating permits and other permits and licenses required under the mining legislation
- Advice on the transfer and acquisition of mining licenses
- Reviewing, drafting and negotiating contracts such as royalty agreements
- Environmental and regulatory compliance
